DPS creative
solutions

Hello!

Here at DPS, each day makes us appreciate our products and their unique features. New projects are often a challenge that pushes us to create new solutions. Stretch ceilings are our passion, and we wish to share this passion with you.

Today, we present to you our new and one-of-a-kind portfolio. It contains 30 projects completed by our authorised partners and us over the last few years. The photographs present DPS products and solutions in various interiors, from well-known public buildings to more intimate private premises, all to show you how easy it is to build a remarkable space, tailored to your exact needs.

Take a look inside and discover the plethora of possibilities offered by DPS stretch membranes. We invite you to get inspired and open up to new ideas. We encourage you to become a brave and bold creator. With stretch ceilings, there are no limits.

Welcome to our world!
